

### DESCRIPTION

Big Atom produces granulated rubber product derived from End of Life passenger car tyres. The textile fibres with rubber granules are mostly fibre with some fine rubber particles embedded.

### PARTICLE SIZE DISTRIBUTION

<1mm (10% wt)

1-2mm (8% wt)

2-4mm (10% wt)

>4mm (72% wt)

### TECHNICAL PROPERTIES

Property	Unit	Results
Chlorine Content	ppm	<33
Biogenic Content	-	6%
EWC Code	-	160103

Property	Unit	Results
Calorific Value	MJ/kg	31
Bulk Density as Sold	kg/m <sup>3</sup>	270
Material Colour	-	Grey

Material Composition	
Rubber	~30%
Fibres	~70%

Production Volume
500-1000 tonne/year

### APPLICATIONS

- Additive in concrete to increase strength
- Pelletised for fuel
- Fuel for cement kilns
- Horse manure bedding

### PACKAGING

Loose

Bagged

Packing: 1m<sup>3</sup> bulk bag
