

Would you like to be part of building a future without waste?

Big Atom is a recycling company on a mission to end polymer waste by reverse manufacturing all types of rubbers and plastics into recycled crude. We are building an infrastructure to process rubber from tyres, before expanding into plastics. We operate a waste tyre collection service, processing plant and an in-house innovation arm developing material separation equipment, pyrolysis technology and software enabling efficient operations management.

At Big Atom we nurture a collaborative and innovative environment to encourage entrepreneurial behaviours. To find solutions to complex problems we promote curiosity, first principle thinking and adopting a growth mindset. We challenge the notion that 'it has always been done this way.'

We are looking for an ambitious self-starter who will be an Operative at our Ellesmere Port site. Your role is at the forefront of our operation as you will be creating new products out of used tyres. You will be reporting into the Production Supervisor. The role will be working a 4 on 4 off shift pattern on either a day or night shift or both on a rotating basis.

This role is predominantly performed outside, therefore if you do not like working in an external environment and getting your hands dirty then this role is not for you. If you do not mind the open air working and are open to working in a challenging but rewarding environment. Then we might just be the company for you.

What you will do

- Work in a safe manner and report any issues that may compromise safety
- Working in line with Big Atom's SOP and PPE
- Operate and monitor heavy machinery to achieve daily production targets
- Carry out basic maintenance of the machinery
- Complete daily clean up as required, including site entrance, walkways, under office, rest areas, Weighbridge, and vehicle route
- Carry out daily defect reporting of Mobile and Fixed plants such as Baler, Shredder and Machinery as required
- Working with engineering team
- Carry out tasks as directed by the Shift Manager

What is require of you:

- Experience working with heavy machinery such as granulators and shredders is desirable but not essential
- To be a proactive person and the ability to use your own incentives
- Focussed yet flexible approach – solution finder
- Basic maintenance experience is desirable
- Experience of using a Telehandler and FLT is desirable but not essential as full training will be given
- FLT experience is essential and ideally an in-date license
- A positive can-do attitude

What is in it for you

- Attractive rates of pay
- Career progression opportunities with a growing business
- A dynamic site which is always looking to develop the people and process further
